

Aptitude Interview Questions (30)

1. What is the average of 10, 20, and 30?

The average of numbers is calculated by dividing the sum by the total count. $10 + 20 + 30 = 60$ and there are 3 numbers. So the average is $60 \div 3 = 20$.

2. What is 25% of 200?

Percentage means a part of 100. 25% of 200 can be calculated as $(25/100) \times 200$. The result is 50.

3. If a train travels 60 km in 1 hour, how far in 3 hours?

Distance is calculated using speed multiplied by time. If the speed is 60 km per hour and time is 3 hours. The distance travelled is $60 \times 3 = 180$ km.

4. What is the square of 15?

The square of a number means multiplying the number by itself. 15×15 gives the result. The square of 15 is 225.

5. If 5 workers complete a task in 10 days, how many days for 10 workers?

Work and workers are inversely proportional. If workers increase, time decreases. So 10 workers will complete the task in 5 days.

6. What is 40% of 250?

Percentage is calculated using the formula $(\text{percentage} \div 100) \times \text{number}$. So 40% of $250 = (40/100) \times 250$. The answer is 100.

7. What is the next number: 2, 4, 6, 8, ?

The numbers increase by 2 each step. Following the same pattern after 8. The next number is 10.

8. What is the ratio of 6:18 simplified?

To simplify a ratio divide both numbers by their greatest common divisor. Both 6 and 18 are divisible by 6. The simplified ratio is 1:3.

9. What is 20% of 150?

20% means 20 out of 100. Using the formula $(20/100) \times 150$ gives the result. The answer is 30.

10. If cost price is ₹100 and selling price is ₹120, what is profit %?

Profit = Selling Price – Cost Price. $120 - 100 = 20$ profit. Profit percentage is 20%.

11. What is 12×9 ?

Multiplication means repeated addition. 12 multiplied by 9 gives the total. The answer is 108.

12. What is the cube of 4?

Cube means multiplying the number three times. $4 \times 4 \times 4$ gives the result. The cube of 4 is 64.

13. If a car travels 100 km in 2 hours, what is its speed?

Speed is distance divided by time. $100 \text{ km} \div 2 \text{ hours}$ gives the speed. The speed is 50 km/h.

14. What is the next number: 5, 10, 15, 20, ?

The series increases by adding 5 each time. $20 + 5$ gives the next number. The next number is 25.

15. What is 75% of 80?

75% can also be written as 0.75. Multiply 0.75×80 to get the result. The answer is 60.

16. What is half of 120?

Half means dividing a number by two. $120 \div 2$ gives the result. The answer is 60.

17. What is 9×8 ?

Multiplication of 9 and 8 gives the product. This is a basic multiplication calculation. The answer is 72.

18. If 2 pens cost £20, what is the price of one pen?

To find the unit price divide total cost by quantity. $20 \div 2$ gives the cost per pen. The price of one pen is £10.

19. What is 30% of 300?

Use the percentage formula $(30/100) \times 300$. This calculation gives the result. The answer is 90.

20. What is the square root of 144?

Square root means the number that multiplied by itself gives 144. 12×12 equals 144. So the square root is 12.

21. What is $200 - 75$?

Subtraction gives the difference between numbers. 200 minus 75 equals the result. The answer is 125.

22. What is 7×8 ?

Multiplying 7 and 8 gives the product. This is a basic multiplication fact. The answer is 56.

23. What is the average of 5, 10, and 15?

First add the numbers: $5 + 10 + 15 = 30$. Then divide by 3 values. The average is 10.

24. If today is Monday, what day after 7 days?

There are 7 days in a week. After every 7 days the day repeats. So the answer is Monday.

25. What is 10% of 600?

10% means one tenth of the number. $600 \div 10$ gives the value. The answer is 60.

26. What is 8^2 ?

Square means multiplying the number by itself. 8×8 gives the result. The answer is 64.

27. What is the next number: 3, 6, 9, 12, ?

The numbers increase by 3 each step. $12 + 3$ gives the next number. The next number is 15.

28. What is $90 \div 9$?

Division splits a number into equal parts. 90 divided by 9 equals the result. The answer is 10.

29. What is 50% of 300?

50% means half of the number. Half of 300 is calculated by dividing by 2. The answer is 150.

30. What is 5^3 ?

Cube means multiplying the number three times. $5 \times 5 \times 5$ gives the result. The answer is 125.
